**Assessment Interpretation**

Your organization scored **17.7 out of 30**, placing you in the **Emerging** readiness band. **Basic readiness established—small-scale AI pilots possible, but substantial progress needed in processes, data, and governance for scaled deployment.** This assessment evaluates your organization's preparedness for adopting and rolling out AI at scale across six critical dimensions including process maturity, technology infrastructure, data readiness, people and culture, leadership alignment, and governance. The insights provided highlight your current capabilities and identify priority areas for advancement.

Add a paragraph at the end of every assessment interpretation: "** Note these results are based on subjective assessments and does not necessarily serve as a substitute for AI implementation preparedness using a more thorough investigation of the organizations' capabilities and performance."

Data Readiness	3.7/5	3.0/5	+0.7	✅
People & Culture	2.0/5	2.9/5	-0.9	⚠

Annotations (editorial instructions):

- Make this title bright orange on all three pages
- Double the thickness of these colored line bars and increase the font size of all the numerical values slightly, even if the chart becomes vertically higher.
- Change the font size to make it slightly smaller than the header font size and make the colors the same as the rest of the document titles.
